

# Mandatory Regulations

# Major German Hotel Management company

Our report presents the results of Sustainability Audits carried out as part of the middle stage of the Sustainability & Energy Efficiency compliance activities.

A number of sustainable opportunities with varying payback periods were identified during the assessment.

Cost savings of approximately **EUR 600.000 /yr** are possible through measures that have a short payback period and represent mayor energy and water savings, and we are not considering here any marketing effort.

## Summary

Summary			Est. Elec. Savings			Est. Therm. Savings			Water Savings	TOTAL SAVINGS	CAPITAL COST	SIMPLE PAYBACK	
			kWh	€	kgCO2	kWh	€	kgCO2	€	€	€	years

## Booking.com Reveals 2017 Sustainable Travel Intentions, Goals and Considerations

**NEW YORK - 19 April 2017** - To celebrate Earth Day on 22 April, Booking.com, the global leader in connecting travelers with the widest choice of incredible places to stay, has released findings from its global Sustainable Travel Report<sup>[1]</sup>. In a year that the United Nations has designated as the International Year of Sustainable Tourism for Development, this new research points to some promising signs when it comes to the eco-considerations weighed by both travelers and accommodations.

### Sustainable travel intentions

The number of travelers staying in an eco-friendly or 'green' accommodation at least once could double this year with 65% of global travelers expressing this intention versus 34% who stayed in one or more last year. In addition, 68% confirm they are more likely to consider choosing an accommodation knowing that it was eco-friendly, with Chinese (93%), Brazilian (83%) and Spanish (80%) travelers the most likely. For a large 79%, sustainable considerations also impact their mode of transport when traveling, with 43% taking public transport whenever possible, 42% trying to walk, bike or hike as much as possible and nearly one fifth (18%) flying less to reduce their carbon footprint.

When it comes to making luxury adjustments in order to stay somewhere eco-friendly, the vast majority of global travelers would be more than happy to accept these, with 94% willing to stay in a property with energy saving lightbulbs, 89% in one with AC/Heating units that only run while you're in the room and 80% in one with low flow showerheads. Below is an overview of the luxury adjustments global travelers would be willing to make to stay at an eco-friendly accommodation:
