

# OUR BACKGROUND ON SUSTAINABLE MOBILITY

- ▶ Climate Adaptation Plans (over 150 cities/towns including Sevilla)
- ▶ Sustainable Mobility Plan for organizations
- ▶ CLIMA Projects (sustainable mobility, carsharing and more...)

# WHAT IS A SUSTAINABLE EVENT?

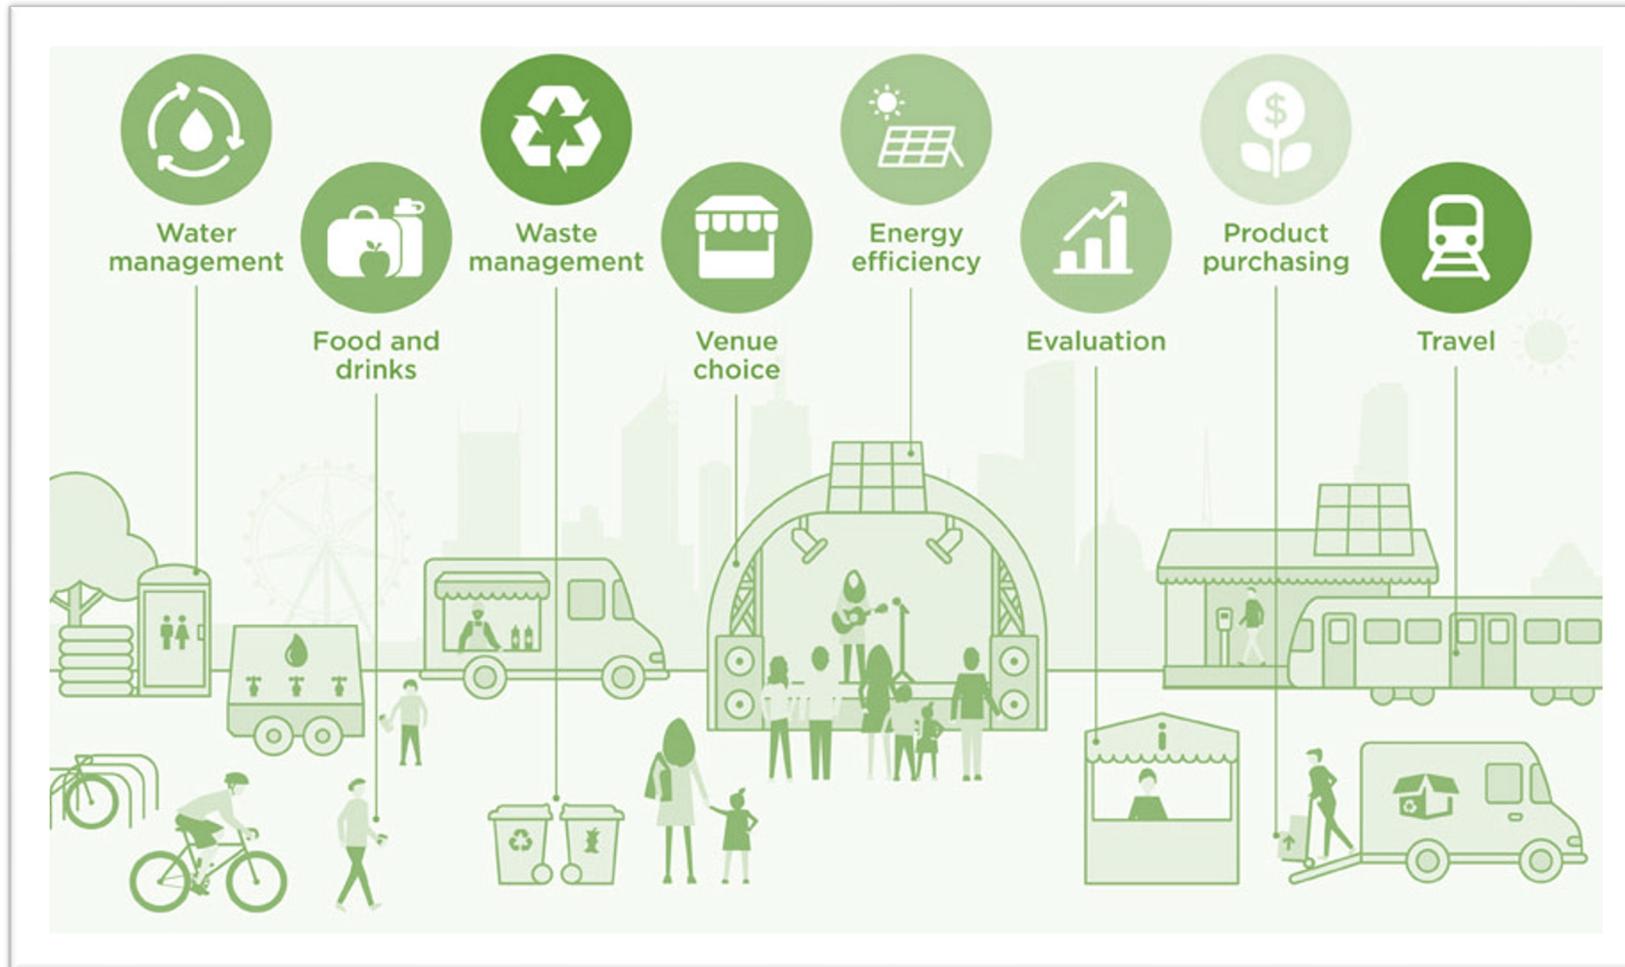

According to the United Nations, a sustainable event is that one which is designed and organized following these 2 goals:

Providing with some benefit to those who participate in any form on it

Minimizing any negative impact to the environment

# WHAT IS A THE CARBON FOOTPRINT OF AN EVENT?

# HOW TO ANALYSE AN EVENT?

## PRE- EVENT

- Purchase of material
- Supplier's transportation for the set up phase
- Electric and gas consumption

## DURING THE EVENT

- Participants/staff/supplier transportation to the city and the venue
- Electric and gas consumption
- Waste management
- Overnight stays
- Catering

## POST-EVENT

- Supplier's transportation for the disassembly phase
- Electric and gas consumption

# WHY IS IMPORTANT TO CALCULATE IT?

- ▶ The Carbon Footprint helps providing technical evidence which it is used to elaborate sustainable plans and choices in future events.

ANALYSIS OF THE MOST  
IMPACTFUL SOURCES OF  
EMISSIONS

TAKING INTERNAL  
ACTION AND SUPPORT  
SUPPLIERS TO DO THE  
SAME

CREATING A GOOD  
PRACTICES

IMPLEMENT NEW GOOD  
PRACTICES

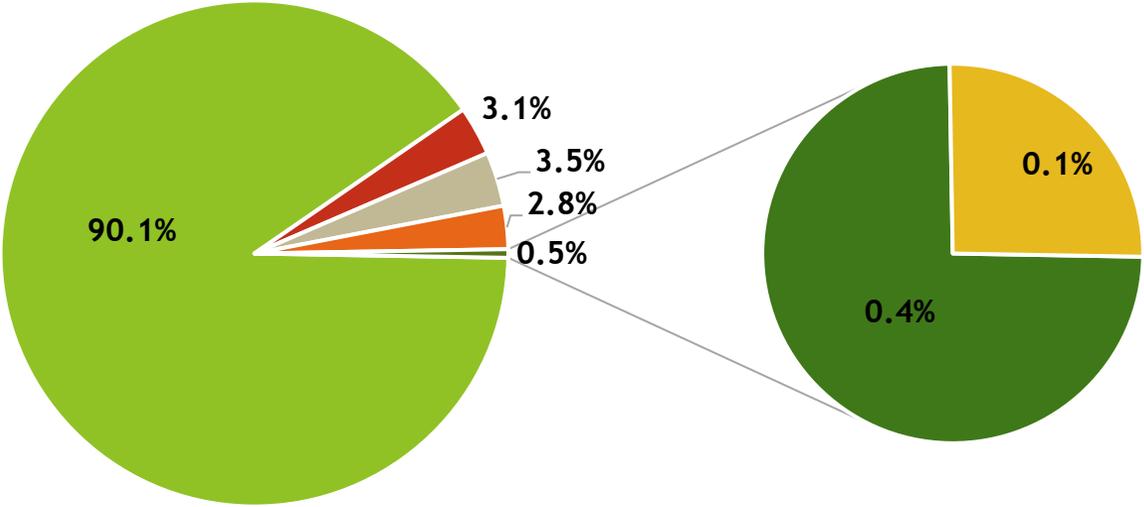

CARBON FOOTPRINT  
RESULTS

# RESULTS OF THIS EVENT

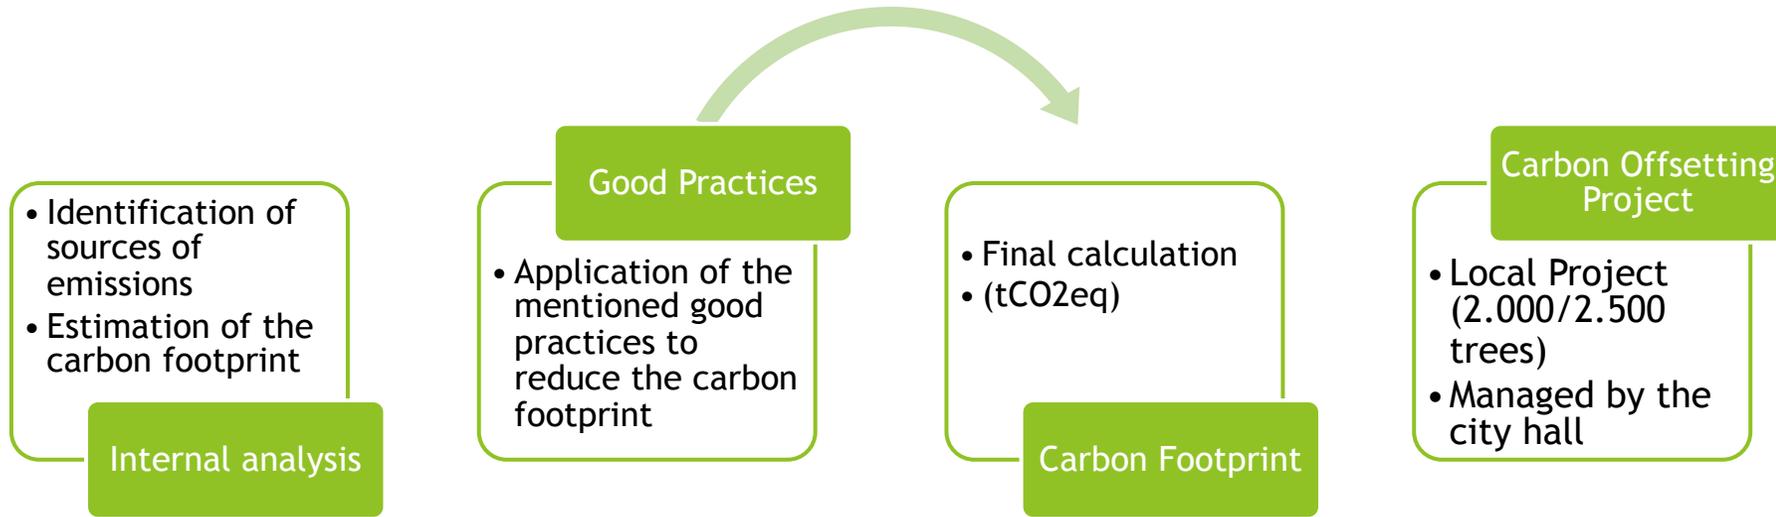

**GHG emissions:**  
165,10 tCO2eq

**Emissions/participant:**  
918 kgCO2eq

- Transport
- Overnight stays
- Catering
- Electricity and gas consumption
- Materials
- Waste management
